EDUCATION

Government College Of Engineering Aurangabad

Aug 2023 – Jun 2027

Bachelor of Technology in Computer Science and Engineering

Current GPA: 7.5(up till 4th Sem)

TECHNICAL SKILLS

Programming Languages:

Java, JavaScript, Python (Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn), HTML, CSS, SQL, NoSQL

Frameworks & Libraries:

React.js, Node.js, Express.js, Flask, FastAPI

Tools & Software:

Linux, Docker, Kubernetes, Firebase, Postman, GitLab, GitHub, Postman

Databases & Cloud Platforms:

MS SQL Server, MongoDB, Redis, AWS, GCP

Domain Knowledge:

MERN Stack Development, DevOps / CI-CD, Machine Learning, Competitive Programming

PROJECTS

AI-Powered Teacher Assistant – Nastavnik

Google Solution Challenge Project 2025 – GDSC | Team Nastavnik

<https://github.com/ronit-1404/gdg-25>

Tech Stack: React.js, Node.js, Express.js, Flask, Gemini API, RAG-based Chatbot, OCR, Sentiment Analysis ML Models

- Built an AI-powered teacher assistant to automate grading, test evaluation, and report generation.
- Designed role-based interfaces for Students, Teachers, and Admins to streamline submissions, feedback, and classroom management.
- Integrated AI for plagiarism detection, automated feedback, report cards, and personalized learning via a **RAG-based** chatbot.
- Enhanced fairness and efficiency by allowing teachers to guide AI with evaluation rubrics, while students benefit from real-time feedback and progress tracking.

Learner Lane – AI-Powered Learning Engagement Tracker

Real-time Multi-modal Learning Analytics Platform

https://github.com/ronit-1404/Hackronyx_25

Tech Stack: React, Vite, Tailwind CSS, Recharts, Node.js, Express.js, MongoDB, TensorFlow, OpenCV, Flask Api, Scikit-learn, JavaScript, Chrome Extension

- Built a real-time student engagement tracking system using ML & Computer Vision to analyze facial expressions, voice tone, cursor behavior, and screen activity.
- Developed Chrome Extensions for screen/audio tracking and distraction prevention, integrated into the engagement pipeline.
- Integrated **CNN** (facial analysis), **SVM** (audio emotion), **OCR + VADER** (screen context) with a modular ML pipeline for real-time interventions.
- Implemented role-based dashboards for students, teachers, and parents with emotion maps, attention scores, and downloadable engagement reports.

ChaWe – Real-Time Chat Application

<https://github.com/ronit-1404/ChaWe>

Tech Stack: MongoDB, Express.js, React.js, Node.js, Socket.io, Tailwind CSS

- Built a real-time chat app with one-on-one messaging, group chats, and secure multi-format file sharing using Socket.io.
- Designed a modern, responsive UI with Tailwind CSS, including typing indicators and group management features.

Experience

Open Source Contributor – GirlScript Summer of Code (GSSOC)

Jun 2024 – Aug 2024

- Dockerized a complete MERN application with multi-service orchestration using Docker & Docker Compose.
- Built and integrated features like currency conversion and currency search for an Expense Tracker app.
- Optimized development workflow by enabling one-command setup and seamless deployment across environments.

CP Lead – C³ (C Cube) Coding Club, Government College of Engineering, Aurangabad

Jan 2025 – Aug 2025

- Mentored and guided juniors in competitive programming, covering topics like algorithms, data structures, and contest strategies.
- I Conducted coding sessions on topics like introduction to competitive programming various problem solving approaches like sliding window greedy approach and dynamic programming.

Software Development Intern – Prodigy Infotech

May 2024 – Jun 2024

- Used Postman for API testing and debugging RESTful services to ensure smooth backend integration.
- Built and enhanced responsive UI components with React, Tailwind CSS, and CSS Modules, resulting in 4% faster page load times.
- Developed full-stack web apps such as a To-Do List and Dashboard using React.js, Node.js, and Express.js

Achievements

- **Pupil on Codeforces**
- **Winner-@Scale Applied AI Challenge (2026)**
Marathwada's first AI summit where we built an end-to-end ML anomaly detection and data engineering pipeline with explainable AI insights.
- **Finalist – HackWithIndia Hackathon**
Selected for the final round of HackWithIndia(Selected in the **Top 10 teams among 600+ teams and 3000+ participants** national-level coding and innovation competition, after successfully clearing multiple technical rounds.
- **1000+** Overall Coding Problems Solved.
- **3rd Prize – TechEscape, JNEC Aurangabad**
Won 3rd place in a tech-based escape room event through rapid problem-solving, logic, and collaboration under timed conditions.
